## PROJECTS

### Healthcare Management System

Designed a Web-app and an Android App created to help facilitate the easy functioning between hospitals, doctors and patients mainly via 5 modules:

- E-prescription: To facilitate medication directly through the app without the use of paper.
- Doctors Appointment: Appointment system online for ease of access of slots.
- Patient Portfolio: To assemble entire medical history of patient for easy reference for doctors.
- Blood Donor Availability: To discover and identify donor availability in nearby areas.
- Ambulance Locator Module: To establish connection to the nearest ambulance via GPS.
